

New webpages for SINTEF Certification

Friday February 17th the new webpages for SINTEF Certification were launched. The new webpages offer better search possibilities, and work well on all screen sizes – PC, tablets and mobile phones.

Search functions

The new webpages offer improved search functions with more possibilities for filters and easier search access. We experience that many visitors on our website are searching for products with documentation from SINTEF. The searches for product type or holder of documentation are therefore easy to find on the webpages.

Approved and certified products

Information about approval and certification

Information about the different types of product documentation or certified people can be found by choosing the info-button "Read about product documentation".

Different types of product documentation

We are using colours to make it easy to see the different types of product documentation, see example below:

| | |
|--|--|
| SINTEF Technical Approval: |  TG 2437 |
| SINTEF Product Certificate: |  PS 1706 |
| European Technical Assessment (ETA): |  ETA 06-0251 |
| European CPR certificate: |  1071-CPR-1142 |
| Environmental Product Declaration EPD: |  NEPD-32-203- NO |

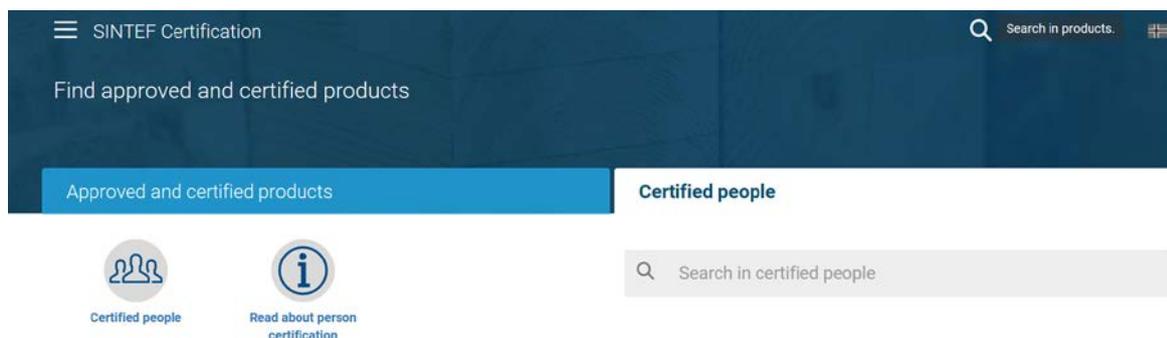

Webpages in Norwegian and English language

In order to find the English webpages, use the English flag in the upper right corner on the webpage:

Certified people

We certify people in accordance with the INSTA 800 standard. You can now search for certified people, company name or certificate number. By choosing "certified people", a complete list of certified people will be shown.

Please contact us on certification@sintef.no if you have feedback about our new webpages.
